ABOUT US

The DYME Institute was founded by Dr. John Dobson to help bring world-class entrepreneurial education to marginalised communities and developing countries. Using a problem-based methodology, we train faculty and staff to be more effective in their teaching.

Entrepreneurship has the power to transform lives and transform communities. How entrepreneurship is learned and taught will make the difference in entrepreneurs' impact on people's lives and communities.

Out of our frustration of realising that the best practices in entrepreneurial education such as, business plans, models, canvases, etc. have not been aiding students in becoming entrepreneurs we developed DYME. Through conducting research, studying the literature, and personal entrepreneurship experiences we created a new pedagogical approach. One built on experiential, problem-based, adult learning principles.

Our approach captures the essence of learning entrepreneurship through an iterative learning cycle that can be incorporated into any classroom using a cohort learning model and practices in the real world. It has been used in higher education classrooms, in globally underserved communities, and taught in workshop style learning to instructors and trainers of entrepreneurship to develop a more robust and intuitive learning experience.

Our research has shown that change is needed in entrepreneurial education. We strive to be that change and provide entrepreneurs with the tools and experience they need to succeed.

WHO IS DYME FOR?

The DYME Program is for faculty, trainers, and program managers wanting to be more effective educators. Moreover, the programs' teaching and learning components are for instructors, trainers, and educators who want to embrace experiential learning to create student-centred and problem-based learning experiences for students. This program will transform the instructor of entrepreneurship into a facilitator of real life entrepreneurial learning. Further, we help to effectively bridge the theory and practice divide of how entrepreneurs actually learn.

EFFECTIVE TEACHING

Our program will help you learn how to be more effective in your teaching and programming. You will be able to develop more entrepreneurs and more successful ventures. The DYME program will empower you to create effective courses, impactful programming, and a vibrant entrepreneurial ecosystem.

NO ENTREPRENEURIAL EXPERIENCE NESCESARY

This program is effective for faculty and staff with no entrepreneurial experience, as well as the seasoned entrepreneur. It is designed to build your confidence and provide you with a toolset to create a learning lab, where students have agency and autonomy to develop and test novel ideas.

PROGRAM HIGHLIGHTS

The DYME Program is focused on helping faculty and staff create a learning climate that is learner-centric. Giving the nascent entrepreneur agency and autonomy in order to think, act, reflect, remove assumptions, and move forward as an entrepreneur to solve meaningful problems.

7 KEY INTERACTIVE APPROACHES WE USE

1. Introduction into DYME Pedagogy
2. Creating Virtuous Cycle of Entrepreneurship in your classroom
3. Learning how Entrepreneurs Learn to become Entrepreneurs
4. Adult Learning Theories
5. Facilitating Entrepreneurial Learning: Construction of knowledge instead of knowledge transfer
6. Teaching Entrepreneurship instead of Management
7. Reflective Learning

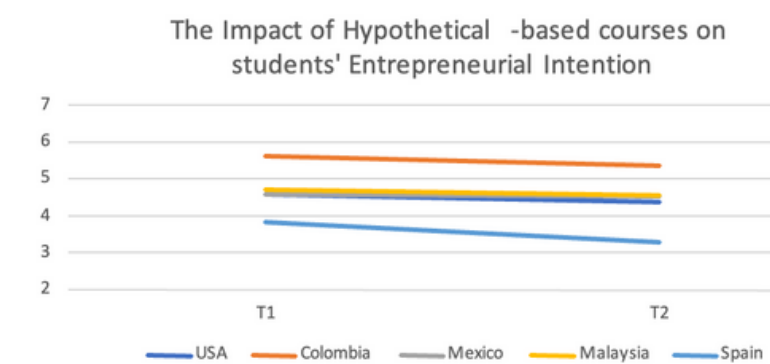

BENEFITS

Our learner-centered approach is highly interactive, participatory, and collaborative. The approach helps you understand the mechanisms required to create a virtuous cycle of entrepreneurship. In turn, this will transform your courses and programming into a model for student engagement and entrepreneurial success.

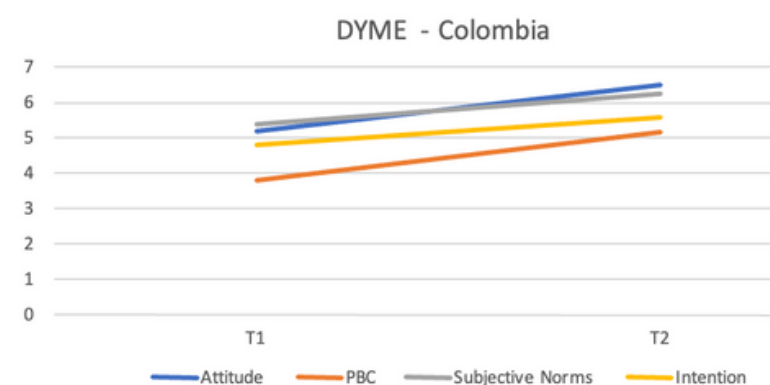

OUR RESEARCH: THE THEORY BEHIND THE PRACTICE

When we focus our efforts and curricular design on experimental problem-based learning we see statistically significant improvement in student learning and entrepreneurial intention. Based off data, from our research studies around the world, we have developed a new pedagogical approach to learning.

GRAPH 1

Impact of Hypothetical Theory Based Coursework on Entrepreneurial Intention

GRAPH 2

Impact of DYME Coursework on Entrepreneurial Intention

THEORY BASED

Our research has shown that hypothetical based, theory based, and process based learning has left a flat line in creating entrepreneurs. As instructors and trainers, it is up to you to create learning that will help participants and students be successful.

PROBLEM BASED

These impressive results are those of a novel pedagogical approach, which involves creating a Virtuous Cycle of Entrepreneurship within your ecosystem. The DYME pedagogy was developed to aid in student centered entrepreneurship learning.

PROGRAM TIMELINES

THERE ARE THREE CORE WORKSHOP AREAS IN THE DYME INSTITUTE'S LEARNING AND DEVELOPMENT PROGRAM

Each workshop is designed to demystify entrepreneurship learning. There are two additional elements designed to support your program development, focused on creating a research agenda and monthly support for up to two years.

OPTION 1

Onsite program with online support

1. Training Trainers (4 courses)

Bridging the Theory into Practice. These workshops provide foundation understanding of a novel pedagogical approach that uses adult learning theories and entrepreneurial learning to effectively teach people to become entrepreneurs.

- a. Introduction to the DYME Pedagogy
- b. Exploring How Entrepreneurs Learn to be Entrepreneurs
 - i. Agency and Autonomy
 - ii. Reflective Learning
- c. Examining Adult Learning Theories
- d. Creating a student-centric learning environment:
 - i. Introduction to the Virtuous Cycle of Entrepreneurship
 - ii. Creating an experiential classroom
 - iii. Develop and teach a micro-lesson and receive feedback

2. Assessing Student Learning (1 Course)

No matter the learning level or institution it is a must as the facilitator/instructor to give appropriate and timely feedback. Furthermore, it is necessary to discover the difference between passive class feedback and expectations versus the experiential class feedback, performance guidance, and student expectations.

- a. Creating impactful learning outcomes
- b. Formative and Summative assessments

3. Developing an Effective and Vibrant Entrepreneurial Eco-system (1 Course)

Understanding how to develop curricular and co-curricular programming is key for entrepreneurial concrete learning. These workshops help faculty and trainers develop learning spaces that increase student agency and autonomy. Faculty will develop and teach a micro-lesson and learn how to assess problem-based teaching and learning.

- a. Re-imagining the learning space - What is your role?
- b. Experiential learning curricular design.

4. Academic Research (1 workshop)

The final workshop will focus on helping faculty develop a rigorous research agenda. Faculty that are interested will be invited to join the DYME team of academics, researchers, and practitioners around the world focused on creating deeper understanding of how to improve the effectiveness of entrepreneurial education.

- a. Creating a research agenda
- b. Target journals
- c. Collecting data, writing up findings, and submitting the articles.

5. Online Monthly check-in (6-24 months)

- i. Feedback on teaching, research, and eco-system

OPTION 2

Online - Synchronous

1. Seven online workshops focused on the same topics a listed above. This can be monthly, bi-weekly or weekly (3-4 hours long)

- a. Online Monthly check-in (6-24 months)
- b. Feedback on teaching, research, and eco-system

ELECTIVE SESSIONS

We have built a series of core learning and development workshops to help instructors and trainers of entrepreneurship take their courses and time with nascent entrepreneurs to a higher level. Learning about entrepreneurship is not enough in today's complicated learning environment. Doing entrepreneurship brings learning to life and can positively impact students' lives and communities.

SPEAKER SERIES

Speakers series by John Dobson the DYME model and research to associated entrepreneurship networks at Universities, governments, and community groups.

ONE ON ONE COACHING

One on one coaching session by a DYME Institute certified instructor on your development as an instructor creating a student-centred problem-solving course.

DEVELOPMENT OF WORKSHOPS

Development of specific workshops related to DYME learning and research by request.

WHAT OUR STUDENTS SAY

"John Dobson's instruction was invaluable in providing tools, methods and insights to better navigate public sector problems. His Creativity & Innovation course helped me develop a problem-solving mindset and left me with a pragmatic toolkit that I can pull from to work through challenges. The experience was unparalleled to any other course I have taken to date. I highly recommend Professor Dobson to any government or non-profit organization looking to empower their teams with an innovation and problem-solving mindset."

LESLIE R.

"I wanted to thank you for the course and instruction that you have provided. Your lessons and instruction have influenced how I perceive the world, how I make decisions, and how I navigate challenges in my work and life. These personal improvements have helped me take on more challenging work, begin formally leading a team, and gain acceptance to an extremely competitive leadership program."

The lessons and group work helped me connect with classmates, gave me new tools to tackle projects outside of class, and helped me be an innovator!"

MIKE B.

MEET THE TEAM

JOHN DOBSON

Executive Director

John started his own business as a college student, successfully running it for 21 years before selling. Since then, his passion has taken him all over the world to give guest lectures and teach courses on entrepreneurship. His desire to be an effective teacher and to aid entrepreneurs in marginalized communities has led to the creation and success of the DYME methodology.

**GILMER YOVANNI CASTRO
NIETO**

Director for Latin America

Gilmer has rich experience in management of business projects practicing implementing management models based on people. His research on CSR, values, leadership, marketing, organisational design, and quality of service provides worthwhile knowledge to the DYME Institute.

LISA DOBSON

Director of Teaching & Learning

Lisa is an experienced social entrepreneur with over 25 years of international business experience and a Masters of Adult Education. She is passionate about connecting formal and informal education for faculty and students.

ANDREINAS MOROS OCHOA

Director of Programming for Latin America

Andreinas completed a DYME Institute Certificate in 2019. Since then, she has been utilizing DYME methods in her teaching practices as a professor at CESA University. She is passionate about developing the next generation of leaders in Colombia and beyond.
