

Our goal is to help entrepreneurs to launch successful businesses. We accomplish this by training the trainers. Our workshops are built on an evidence-based approach to entrepreneurship education. We focus on developing a solid understanding of the 10-step DYME Model for developing ideas into viable business opportunities. The program provides an understanding of the key principles of how entrepreneurs learn to become effective entrepreneurs. We allow facilitators to move away from ineffective top-down approaches towards creating a learning cohort focused on bottom-up solutions to ignite entrepreneurship within local communities. Facilitators will learn how to create a learning cohort that relies on intrinsic motivation, agency, and autonomy to develop novel solutions to solve local problems.

SESSION	DESCRIPTION OF WORKSHOP	LEARNING OUTCOMES
90 Min	Introduction to Entrepreneurship 1. DYME 2. Research on Entrepreneurial Education 3. Habits of Successful Entrepreneurs	Understand the discrete steps in developing ideas into viable business opportunities. • At the end of the course, facilitators will understand the process of new developing new ideas and testing business hypothesis. • Explain the venture creation process through Creativity, Innovation, and Commercialization. • Apply the DYME model to ideas to help themselves or others develop ideas into opportunities.
90 Min	Entrepreneurial Learning 1. Adult Learning Theories 2. How Entrepreneurs Learn to Become Entrepreneurs	Understand the entrepreneurial education landscape • At the end of the course, facilitators will be able to compare and contrast the three main approaches to Entrepreneurial Education. • Understand the differences between management and entrepreneurship. • Understand the challenges of using 'best practices' in entrepreneurial education. • Explain the key concepts of problem-based learning.
90 Min	Facilitating Entrepreneurial Learning 1. Mentoring and Monitoring the Learning Journey 2. Creating a Virtuous Cycle of Entrepreneurship	Understand entrepreneurial learning • At the end of the course, facilitators will be able to explain the differences between informal, non-formal, and formal learning. • Understand the role of agency and autonomy in the entrepreneurial process. • Discuss how entrepreneurs learn to become entrepreneurs in the context of using the Virtuous Cycle of Entrepreneurship (VCE).
90 Min	Facilitating Practicum 1. Introducing the DYME Model to Nascent Entrepreneurs (Tier 1 Clients) or Venture Growth (Tier 2 Clients)	Understand how to create a student centric Learning Environment. • At the end of the course, facilitators will be able to understand learning motivational theories. • Be able to discuss how to incorporate key elements of the Zone of Proximal Development to entrepreneurship education. • Explain how to apply the principles of Facilitation to entrepreneurial education. • Be able to develop a micro-lesson. • Intentional use of VCE in entrepreneurship and business problem solving followed by feedback and coaching.
60 Min	Follow-up Mentoring 1. Four (4) Bi-Weekly Sessions to Develop a Facilitator Learning Cohort On-Line or In-Person	Understand key elements of the Virtuous Cycle of Entrepreneurship (VCE) • At the end of the course, facilitators will be able to understand and implement the VCE. • Explain how to facilitate a class discussion using the VCE. • Apply and implement the VCE to a learning cohort of entrepreneurs.
